

HYB-LT XS-Unit (Hydraulic Booster LT)

The HYB-LT XS-Unit is designed for a continuous performance with a high operational life span. Our many years of experience in the field of hydraulic units and components are translated into this compact, powerful and universally applicable drive unit.

The system is fitted with a fixed displacement pump of a well-known manufacturer which operates in an open circuit. In comparison with other hydraulic units on the market the HYB-LT XS-Unit benefits from its compact construction and high quality components.

Technical data:

- all mechanical frame components are manufactured from stainless steel and aluminium
- fixed displacement pump with a discharge of maximum 120 l/min, working pressure up to 350 bar
- pressure limitation valve (adjustable) as a safety device
- return flow filter 10µm, aluminium housing
- 30 liter oil tank with oil sight glass
- oil cooler with 11kW cooling capacity, aluminium design, with fan drive 24VDC
- drag hoses to the trailer highly resistant to abrasion
- holder for drag hoses included for a safe fixture during tours without a trailer
- frame cover in vehicle-specific design
- optional monitoring of the filter and oil level, different concepts of control available
